A FOUNDING MEMBER OF

The course includes 3 units in total which will be studied over two years.

Unit 1 Safety and security in construction

Construction activities take place in many different contexts. Through this unit, learners will gain the knowledge and understanding to be able to plan how to minimise risk to their own and others health and safety in different contexts.

Unit 2 Developing Construction Projects

Through this unit learners will be able to interpret technical information to plan the refurbishment of a building, taking account of health and safety issues. They will use appropriate skills and techniques to carry out the refurbishment.

Unit 3 Planning construction projects

Through this synoptic unit, learners will use learning from the development of practical skills and health and safety requirements of construction processes and gain the knowledge and understanding needed to plan straightforward built environment development projects.

Please note that as part of the qualification all learners must wear appropriate levels of personal protective equipment. Under the Health and Safety at work act 1974 anyone who is taking part in practical activities in the workshop must wear overalls and steel toe cap boots.

High levels of professionalism is also expected ,as once completed learners can apply for apprenticeships in their chosen vocational area
